Alberta's International Exports January - September 2003 Highlights

Overview: In the first three quarters of 2003, Alberta's international exports increased 25%, to \$43.1 billion, compared to the same period last year. This was the highest provincial growth rate in Canada and was largely the result of price driven increases for crude oil and especially natural gas exports. Two consecutive years of drought and international border closures to Canadian meat and live cattle have resulted in lower beef, livestock, and grain volumes. Alberta's exports increased 14% in the third quarter, compared to the same period last year, as a result of sharp increases in polyethylene, canola, refined petroleum and ethylene polymers. During the same quarter, there were no live cattle exports, as well as large decreases in telecom equipment and beef shipments.

Major Commodities: For the first nine months of 2003, natural gas and propane exports rose 66% and 35%, respectively, as higher prices more than offset lower export volumes. Crude oil exports increased 35%, as both volumes and prices increased. Export volumes of beef (fresh and frozen) and live cattle decreased 45% and 59%, respectively, as a result of the border closures. Exports of polyethylene, acyclic hydrocarbons, ethylene polymers, anhydrous ammonia, canola, refined petroleum (e.g. diesel fuel) and nickel were sharply higher. Large decreases were registered for lumber, wheat, telecom equipment and coal.

Exports by Industry: Exports by the mining & energy sector rose 49% because of higher prices for gas, oil and propane. Lower volumes caused a 26% drop in primary agricultural exports, led by declines in wheat and livestock. Manufacturing exports fell by 8.5%, because of large declines in *food, feed & beverage (beef), computer & electronic products (telecom equipment), and transportation equipment*. The manufacturing sub-sector registering the largest gain was *petroleum & coal products*.

United States: Total exports to the US grew 30%, primarily as a result of increases in gas and oil exports. However, declines in beef and

livestock volumes somewhat tempered this rise. In 2002, nearly all live cattle exports were to the U.S., and this market accounted for 80% of Alberta's beef exports. As well, California is phasing out the use of MTBE, an ether based gasoline additive, resulting in a \$300 million export loss.

Asia: Exports to Asia fell 6.6% from the previous year. Strong growth in Asian imports of pork, canola and nickel was more than offset by declines in wheat, machinery, beef and coal imports. Imports into Pakistan, Taiwan and Bangladesh increased strongly, but Indonesia, South Korea, Hong Kong and Singapore registered large declines. Exports to Japan fell 8.8% due to lower coal, wood pulp, forage product and beef shipments, and China declined 5.9%, as a result of lower ethylene glycol, barley and sulphur shipments.

Europe: Exports to Western Europe were 0.2% higher than in the same nine-month period of 2002. Increases in nickel and durum wheat exports were offset by declines in telecom equipment, coal and wood pulp. Exports to Belgium and the Netherlands increased sharply, while shipments to France, Germany and Spain declined. Exports to Eastern European countries rose 34%, led by substantial growth in imports of oil and gas equipment by Russia and Azerbaijan.

Latin America: Alberta exports to South America dropped by 12% because of large declines in sales of wheat and coal. Central American imports fell 7.2%, due to decreases in beef and wheat imports. Shipments to Mexico fell 13%, as a result of declines in meat and milk powder.

Other Regions: Exports to the Middle East fell 23%, as a result of lower oil & gas field machinery exports. African imports from Alberta fell 11% because of lower wheat and durum wheat imports. Exports to the Oceania region rose by 23%, due to increased imports of ethylene polymers and machinery by Australia.

ALBERTA'S COMMODITY EXPORTS SUMMARY

All other US States	1,000,302	816,634	-18.4%	2,962,798	2,550,834	-13.9%
Total Exports to the USA (excl. Oil & Gas)	3,347,317	2,863,876	-14.4%	9,938,656	8,579,084	-13.7%

* Exports to individual states can be seriously over- or under-stated, because energy exports, such as crude oil and natural gas, cannot be allocated to the state of final destination. For example, exports to Washington are overstated and to California understated.

** Excluded commodities include: Crude Oil, Natural Gas, Propane, Butane and other Natural Gas Liquids

* Exports to individual states can be seriously over- or under-stated, because energy exports, such as crude oil and natural gas, cannot be allocated to the state of final destination. For example, exports to Washington are overstated and to California understated.

* Exports to individual states can be seriously over- or under-stated, because energy exports, such as crude oil and natural gas, cannot be allocated to the state of final destination. For example, exports to Washington are overstated and to California understated.
